# Mastering Medicine 2019

Mastering Medicine 2019 is a unique educational program for post graduates in Medicine – MD, DNB, MRCP – and practicing physicians, organized by the Academy of Continuing Medical Education at Sundaram Medical Foundation. As an institution committed to medical education since its inception in 1994, SMF understands that continuous update of the understanding of diseases, newer diagnostic options and therapies is essential for evidence based practice of Medicine.

The Department of Medicine and Allied Specialties at SMF consists of internists and specialists who are experts in their respective fields with a passion for teaching the large number of post graduates in the institution. SMF is accredited to the National Board of Examinations for training post graduates in ten specialties. The programs are much sought after, due to the reputation that the institution has in the field of medical education.

Mastering Medicine 2019 is a one day program designed to cover topics of relevance and importance both for post graduates in Medicine and practicing physicians. The speakers are consultants working in Sundaram Medical Foundation and the sessions will be comprehensive to enable applied learning.

The theme for “**Mastering Medicine 2019**” is “**Evidence Based Practice of Medicine**”.

We continue the pattern of last year and all the sessions will be in the form of “**Case Scenario Based**” discussions, which will be thought provoking and interactive.
